List of Tables

1. Additional unit definitions	3
--	---

1. Usage

1.1. Load the whole `stmunits` package

1.1.1. Description

This is an interface package which loads the base package and the style choice.

By default the package loads

- `stmunitsbase.sty`
- `stmunitsitems.sty`
- `stmunitsstyles.sty`

See subsection 1.1.2 for options to change the default package behavior.

1.1.2. Options

Option *styles* This is a boolean option. Expected values are either `true` or `false`. It controls whether to load the predefined styles.

```
\usepackage[styles=true|false]{stmunits}
```

`styles=true` is the default. It is used in case `styles=false` is not set explicitly.

Option *style* This option value is the equivalent to section 1.4.2 and is passed through to the underlying package.

1.2. `stmunitsbase`

This package loads the underlying base package.

1.3. `stmunitsitems`

This loads new unit definitions, not initially defined in the base package. See section 2 for the definitions.

1.4. `stmunitsstyles`

1.4.1. Description

This package contains styles for the representation of units and numbers.

1.4.2. Options

Option *style* This is a string option. A list of possible values is shown in section 3.

```
\usepackage[style=stmdefault]{stmunitsstyles}
```

`style=stmdefault` is the default. It is used in case no other style is set explicitly.

2. Items

Table 1: Additional unit definitions

Length			
<code>\si {\foot }</code>	ft	<code>\si {\inch }</code>	in
Temperature			
<code>\si {\degreeFahrenheit }</code>	°F	<code>\si {\degreeRankine }</code>	°R
Force			
<code>\si {\dyn }</code>	dyn	<code>\si {\poundforce }</code>	lbf
Pressure			
<code>\si {\barye }</code>	Ba	<code>\si {\psi }</code>	psi
Density			
<code>\si {\slug }</code>	slug		
Energy			
<code>\si {\erg }</code>	erg		
Misc.			
<code>\si {\promille }</code>			

3. Styles

There are different predefined styles available to format your numbers and units.

3.1. `default`

This loads the default style from the underlying base package and does not apply individual styles.

3.2. `stmdefault`

This loads unit definition style for the stm package. Have a look at the code in appendix A.4 for details.

A. The code

A.1. stmunits.sty
