1.1	l. Lo	oad the whole stmtabular package				
1 1	1 Г	Description				

This is an interface package which loads date styles and commands commonly required throughout document creation.

By default the package loads

• stmtabularcolumntypes.sty

See subsubsection 1.1.2 for options to change the default package behavior.

1.1.2. Options

Option columntypes This is a boolean option. Expected values are either true or false. It controls whether to load the predefined column types.

\usepackage[columntypes=true|false]{stmtabular}

styles=true is the default. It is used in case styles=false is not set explicitly.

Option booktabs This is a boolean option. Expected values are either true or false. It enables and disables the loading of the booktabs package.

\usepackage[booktabs=true|false]{stmtabular}

booktabs=true is the default. It is used in case booktabs=false is not set explicitly.

2. Column types

With the option columntypes=true, the column type definitions from the Thesis Template are loaded.

2.1. p-column type based

fixed width (L: left)	fixed width (C: center)	fixed width (R: right)
text which is considerably longer than the width of the column	text which is consid- erably longer than the width of the column	text which is consider- ably longer than the width of the column

2.2. X-column type based

variable (W: left)	variable (Z: center)	variable (Y: right)
text which is considerably longer than the width of the column	text which is considerably longer than the width of the column	text which is considerably longer than the width of the column
