2023-02-11

These are the date definitions for `stmlatex`. It is build upon the datetime2 package.

Contents

1. Usage

1.1. Load the whole `stmdate` package

1.1.1. Description

This is an interface package which loads date styles and commands commonly required throughout document creation.

By default the package loads

- `stmdatebase.sty`
- `stmdatecommands.sty`
- `stmdatestyles.sty`

See subsubsection 1.1.2 for options to change the default package behavior.

1.1.2. Options

Option *styles*   This is a boolean option. Expected values are either `true` or `false`. It controls whether to load the predefined date styles.

`\usepackage[styles=true|false]{stmdate}`

`styles=true` is the default. It is used in case `styles=false` is not set explicitly.

Option *commands*   This is a boolean option. Expected values are either `true` or `false`. It enables and disables the loading of specific date commands.

`\usepackage[commands=true|false]{stmdate}`

`commands=true` is the default. It is used in case `commands=false` is not set explicitly.

1.2. `stmdatestyles`

1.2.1. Description

This package contains styles for displaying dates in different formats. These can be used by commands from the underlying datetime2 package, e.g. with the style definitions from subsubsection 1.2.2

`\DTMsetdatestyle{$STYLENAME$}\DTMtoday`

or use the convenience commands from subsection 1.3.

1.2.2. Styles

These are the date styles and the respective output.

<div align="center">

versiondatestyle   20230211

</div>

1.3. `stmdatecommands`

1.3.1. Description

These are commands to manipulate dates and their display.

1.3.2. Command `\formatdate`

Examples

```
\formatdate[versiondatestyle]{\DTMToday}        20230211
\formatdate{\today}                             20230211
\formatdate[versiondatestyle]{\today}           20230211
\formatdate{2019}[2][3]                         20190203
\formatdate[versiondatestyle]{2019}[2][3]       20190203
\formatdate[versiondatestyle]{2019}[11][3]      20191103
\formatdate{2019}[2]                            20190201
\formatdate[versiondatestyle]{2019}[2]          20190201
\formatdate{2019}[2][]                          20190201
\formatdate[versiondatestyle]{2019}[2][]        20190201
\formatdate{2019}[][]                           20190101
\formatdate[versiondatestyle]{2019}[][]         20190101
```
